

159. Longest Substring with At Most Two Distinct Characters

Medium [1967](#) [31](#) [Add to List](#) [Share](#)

Given a string `s`, return *the length of the longest substring that contains at most **two distinct characters***.

Example 1:

Input: `s = "eceba"`

Output: 3

Explanation: The substring is "ece" which its length is 3.

Example 2:

Input: `s = "ccaabbb"`

Output: 5

Explanation: The substring is "aabbb" which its length is 5.

Constraints:

- `1 <= s.length <= 105`
- `s` consists of English letters.
